

Workshop Outline:

The focus of this workshop is to equip those in positions of custodianships to understand the broad principles and techniques of asset management.

This is of particular application to those organisations who wish to commence the AM journey, but would like to better understand first-hand what the steps are and what the resource, skill and other requirements are from their perspective. Case studies are used to illustrate examples.

What is covered?

- Asset Hierarchies and Levels of Service
- Service Centric Asset Management Planning
- Long Term Financial Planning Methods
- Demand Management and Asset Management Plans
- AM strategies and policies
- Asset Accounting
- Depreciation Methods
- Applying service levels to maintenance delivery
- Developing Robust AM plans
- Life Cycle Costing.
- Needs Based Budgeting

Duration:

Standard Program – 2-4 hours

Advanced Program – 1 day

Method of Delivery:

In-house only. Public schedules are not catered in this program.

Costs and Schedules:

This program is delivered as a public training course and as an in-house training course. For specific costing and schedules please contact us on: training@aceam.com
